**HINT FOR AVOIDING BREAKAGE OF TREE ROSES-** Bamboo stake in pot at time of purchase is temporary. Replace it with a steel stake, preferably solid round stock or rebar, ½" in diameter – long enough to drive into solid ground 12" to 24" below pot bottom and reaching to graft at top of tree. Tie at several points with long term life tie material. Use of large diameter wood stakes or metal fence posts can result in excessive root damage.
